FRS PLUS CHEWS, POWDER AND READY-TO-DRINK SINGLE SERVINGS

New Sun Nutrition's FRS Plus has been on the market for well over a year now. Made from a combination of flavinoid antioxidants, key vitamins and metabolic enhancers, FRS Plus is designed to neutralize free radicals in the body and promote health at the cellular level. With the success of its liquid concentrate, New Sun Nutrition has introduced three new forms of FRS Plus: chews (\$14), powder (\$18) and ready-to-drink servings (\$28 for a 12 pack). The new formats of the supplement should help anyone find a way to fit it into their regime. www.frspus.com
